

Solution or Sidetrack?

Carbon Capture and Storage goes under the spotlight

Does Carbon Capture and Storage (CCS) have an essential part to play in making serious reductions of global CO2 emissions, or is CCS a doomed bid by powerful and vested interests to preserve the fossil fuel industry?

Join Green Capital for a lunchtime debate, with keynote addresses from international guest Jim Carter and The Australia Institute's Richard Denniss, followed by a panel discussion to put CCS under the spotlight and probe its economic and environmental policy dimensions, and implementation challenges.

Find out where CCS is headed. Don't miss Solution or Sidetrack?

Melbourne
Monday, March 15th, 12pm – 2pm
